

• PROFESSIONAL GRADE SUPPLEMENTS •

ALLMAX introduces D-Aspartic Acid (DAA) in a free-flowing powder. D-Aspartic Acid is a highly bioavailable form of the more common L-Aspartic Acid. Recent human clinical research using oral dosages of 3.12 g per day revealed a dramatic 42% increase in serum testosterone levels in just 12 days [1].\*

Athletes and bodybuilders looking for a natural boost in testosterone have found a 2-week on, 1-week off cycle and repeat protocol to work best. DAA supports natural testosterone production, making it a popular choice for those looking to optimize and sustain peak testosterone levels.\*

ALLMAX DAA is a pure, unadulterated DAA powder, allowing for precise dosing and easy stacking with your preferred beverage. Each lot is lab-tested for purity and quality, ensuring you get a clean and effective supplement.\*
