

• PROFESSIONAL GRADE SUPPLEMENTS •

There are nine Essential Amino Acids (EAAs) required by your body to build muscle. Your body cannot produce these EAAs requiring the athlete to look to other sources such as diet or supplements.

ALLMAX Essential Amino Acid (EAA) delivers 9.25g of all nine EAAs including 5,088mg of BCAAs (in a 2:1:1 ratio) which are clinically proven to support muscle growth and recovery.*

The Total Molecular Weight of ALLMAX EAAs includes both the active form of the EAA as well as the binding agent (HCl). We use the HCl form with some of our EAAs to improve solubility. The dosages listed on our supplement facts panel includes the active form of the EAA providing the athlete with 9.25g of active EAA in every serving.
